

COMPLETE POWDER ACTUATED SYSTEM FOR CONCRETE & STEEL APPLICATIONS

The range consists of a pre-determined length of wire from 1 metre to 10 metres with a choice of Safe Working Loads:

- Green 10kg
- Silver 35kg

The system consists of wire and clip with a ferruled shot fire bracket complete with ballistic point nail.

- Key free release system
- Available in single or double wire drop
- Eliminates drilling
- Tear drop shape allows for wire to rotate through 180deg in bracket for angled applications
- Wire rotation reduces pressure on nail when service is not directly below anchor point

APPLICATION

Suitable for fixing substrates including:

- Concrete Slab
- Profile Steel Decking

- Ballistic point nail compatible with a range of Powder Actuated Tools (PAT)
Hilti DX460, DXA40, DXA41 & DX351
Spit P200 & P370
- Plastic protection sleeve
- High tensile Galvanised wire 1960n/mm² grade 7x7 construction
- BSEN 12385 Standard

Sizes 6-9 metres are also available

INSTALLATION METHOD

- Insure substrate is suitable for nail and cartridge
- Locate nail into the barrel of the Powder Actuated Tool
- For firing follow gun manufacturer's guidelines.
